### **Blood Donation camp – An Extension activity**

Our college regularly organizes a voluntary Blood donation Camp with the support of IQAC, Red Cross Unit, NCC, NSS and Rovers. Different units of our college supports voluntary blood donation without compensation. Regular donors are the basis of a safe and sustainable distribution system of blood products, providing blood to those who need it.

#### **Five Reasons to Donate Blood**

##### **1. Development of new red blood cells**

Within the first 48 hours of blood donation, the donor's body starts replenishing the lost red blood cells. The replenishment process helps in staying healthy and productive at work.

##### **2. Reducing risk of heart disease**

As per several studies and reports, when there is a rise in the iron level in blood, it raises the chances of heart diseases. People should donate blood from time to time in order to reduce the iron level in the blood.

##### **3. Burns calories**

Donating blood can burn approximately 650 calories for each pint that is like 450 ml of blood.

##### **4. Free blood test**

On donating blood, the donor receives a free mini health screening and blood tests.

##### **5. How often can one donate blood?**

The minimum time advised between two donations is 3 months. This gap helps blood regain the normal haemoglobin count.

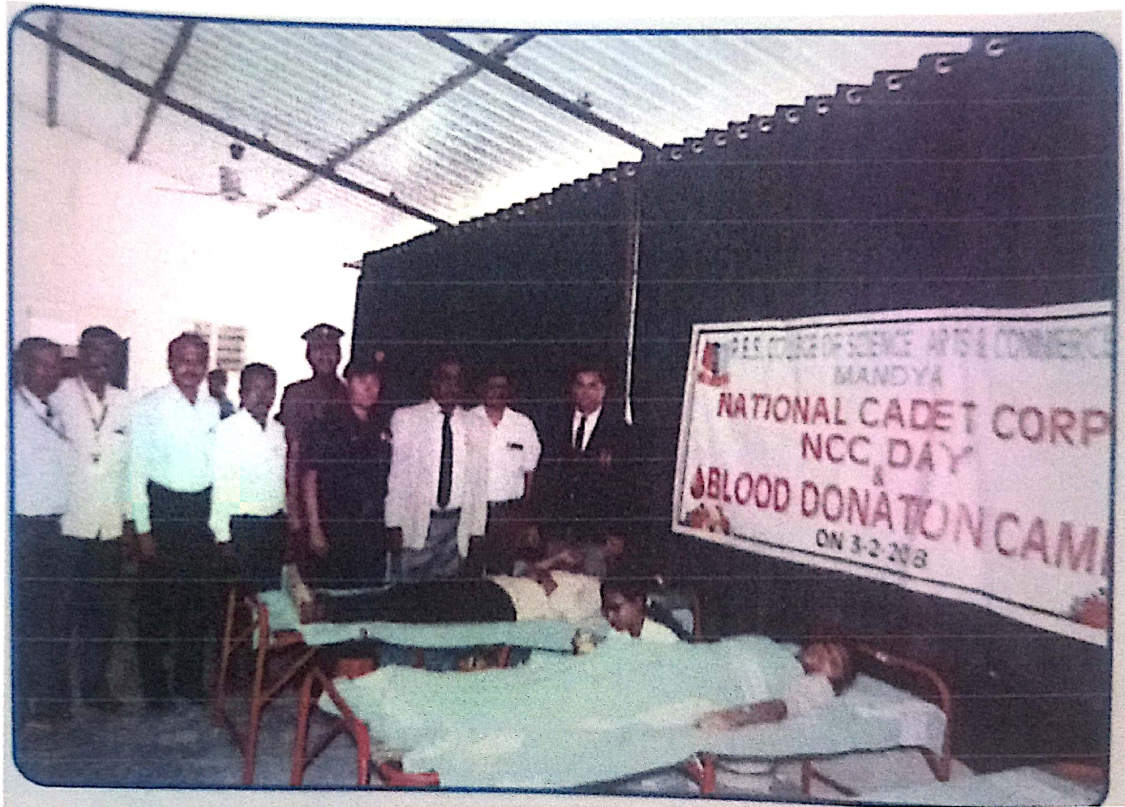

#### **Who can donate blood?**

The age of the donor must be above 18 years and below 60 years of age. He/she must have a haemoglobin count that is not less than 12.5 g/dl. The Weight should not less than 45 kgs. One should have a normal body temperature at the time of donation.

### Disaster Management - An Extension Activity

Disaster Management Policy of India formulated in 2009 emphasizes on Involvement of Community, Civil, Defence, Volunteers, NGOs, Ex-Servicemen and Youth organizations in all aspects of Disaster Management. It lays down roadmap/directions for holistic and proactive approach towards prevention, mitigation and preparedness. A volunteer is someone who contributes their time, skills and experience to an organisation or group and gives their time for free. In return, a volunteer may gain work experience, broaden their own skills, develop new interests and become more involved with the community.

Our Rovers are properly trained; they can rush to the disaster spot and can help the disaster management team for quick rehabilitation and resettlement of victims at times of floods, earthquakes and drought etc. They also spread awareness to the precautions to be taken at times of disasters. Our Rovers tried to prevent and reduce the impacts of disasters on communities, distribute clean water and non-perishable food, cleared out fallen trees and other debris, prepared hot meals for community members and first responders, provided clothing and cleaning supplies.

### **Assistance in controlling Traffic - An Extension Activity**

Traffic control is the supervision of the movement of people, goods, or vehicles to ensure efficiency and safety. For college students, spending some time volunteering can be especially beneficial in a variety of ways. Serving others reaps many benefits spanning a student's health, community and even career prospects. As they make new connections and learn skills to advance their career, student volunteers feel happier and healthier. They strengthen ties to the community and broaden their support network. One of the greatest benefits of community service is simply the rewarding and personally enriching act of helping others. Consequently, one of the main reasons college students may be drawn to social work is to help people and communities in need through worthwhile causes. Volunteering gives students the opportunity to give their time and talents to support a cause that's important to them.

Our college rovers are encouraged for all social services In order to smoothen the traffic our college rovers worked as volunteers in managing traffic. They make through volunteer work positively reinforce an important key to success: even the smallest tasks make a big difference to the lives of people and organizations in need.

### **Plastic Eradication Programme - An Extension Activity**

Plastic pollution can alter habitats and natural processes, reducing ecosystems' ability to adapt to climate change, directly affecting millions of people's livelihoods, food production capabilities and social well-being. Plastic Free is a global movement that helps millions of people be part of the solution to plastic pollution. Try to reduce your plastic footprint by choosing food without plastic packaging and bringing a reusable bag. Our college Rovers were participated in Plastic Eradication Programme. The objective of this program is to give awareness among student community about the hazards of single-use plastics. In the process it seeks to ban the use of plastic bags and plastic products, and reduce plastic littering .Our college Rovers were also participated in spreading awareness about the hazards caused by discarded plastics to facilitate a behavioural change in plastic consumption.

### Assistance in Pulse Polio Program - An Extension Activity

Pulse polio is a programme run by the government to eradicate polio from the country. In this campaign children up to five years are given polio drops to prevent the disease. The Pulse Polio Initiative was started with an objective of achieving hundred per cent coverage under Oral Polio Vaccine. It aimed to immunize children through improved social mobilization, plan mop-up operations in areas where poliovirus has almost disappeared and maintain high level of morale among the public.

Our college Rovers participated in pulse polio vaccination programme in association with district health and family welfare department and also participated in awareness campaigns in order to achieve polio eradication in the near future.

**Our college Rover Akash N P actively participated at Pulse Polio Programme**

### Sowing of Different varieties of Seeds in Grassland-An Extension Activity

Sowing seeds is an essential part of crop production. It is the process of putting the seeds into the soil for growing crops. One needs to use quality seeds for sowing. Sowing is done manually using mechanical equipment like Seed Drill. Sowing should be done carefully and evenly. The importance of seed sowing is that if we plant something in the proper conditions, water, and feed and grow it, we can reap something bigger and greater. Our college Rovers extended their services in sowing of different varieties of seeds in grassland at Himavad Gopala Swamy Temple as a part of Rovers Annual Activity.

### **D-Line Burning – An Extension activity**

The most common hazard in forests is forests fire. Forests fires are as old as the forests themselves. They pose a threat not only to the forest wealth but also to the entire regime to fauna and flora seriously disturbing the bio-diversity and the ecology and environment of a region. During summer, when there is no rain for months, the forests become littered with dry senescent leaves and twinges, which could burst into flames ignited by the slightest spark.

In this direction, our college **Rovers Crew** extended their services for D-Line Burning at forest area. Every year our college Rovers Crew visit Bandipura Sanctuary at Gundlupet Taluk, Karnataka and performs D-Line Burning and also other forest protective activities.

During 2017-18, **D-Line burning activity** carried out at Bandipura Sanctuary in association with Forest Department from 26-01-2018 to 30-01-2018

**NSS Annual Camp – Adopting a Village – An Extension activity**

The Institution has NSS wing which is focused on awareness programmes on Health, Cleanliness, Blood donation camps and even social work in rural areas. These programmes provide students an opportunity towards community feeling and also create an atmosphere of oneness. Students from all kinds of background interact with one another which help them towards a holistic growth. Patriotism and service is the focus of all these service organizations. The Annual NSS Camps are conducted every year in remote villages to create social, economic, health awareness. To promote citizenship roles, students are encouraged to involve in NSS activities, such as weekly and annual camps, Health Camps and other social service activities. Awareness about the use of plastic, importance of growing plants, proper utilization of water resources etc. were also focused.

- The college has Two NSS units and the Principal nominate the faculty members as NSS Officers on rotation basis.
- The NSS Officers educate the students about benefits and opportunities by actively participating in NSS and Annual camps.
- The NSS volunteers, during Ten days special camp, create awareness towards Right to Information Act, Right to Education Act and Women Harassment.
- During day's regular service, the volunteers participate in cleaning the Temple and other public places to create awareness of cleanliness.
- Every year NSS wing chooses a particular village. It surveys the programmes to be undertaken here. It may be roads, drainage, toilets or cleaning in and around the schools and dry wells. The cooperation of locals is taken to begin and conclude the programme. Along with this, awareness programmes are conducted by inviting luminaries and the members of judiciary to provide their views.
